

CLEMAP
CLEVER ENERGY MAPPING

// BENEFITS FROM ELECTRICITY DATA

Consumers and energy providers can now actively manage energy consumption thanks to digital access to electricity data.

// FOR CONSUMERS

Thanks to an easy-to-install sensor and a free app, CLEMAP helps you to optimise the electricity costs of your appliances.

// FOR PROVIDERS

As a provider, you can now access real-time data to improve grid efficiency and develop future products.

// FOR ENVIRONMENT

CLEMAP raises awareness and reduces energy consumption.

With the CLEMAP App, energy is at your fingertips.

CLEMAP provides utility companies with detailed information regarding the electricity consumption of their customers.

Real-time data can be used to improve grid efficiency, enable energy forecasting and support the development of future products.

The CLEMAP sensor and app provide private households and small and medium-sized businesses with information on the electricity costs for each individual appliance. This enables customers to adapt their consumption accordingly.
