

Let's talk about wind power

Winter, night and cloudy day

Summer and clear day

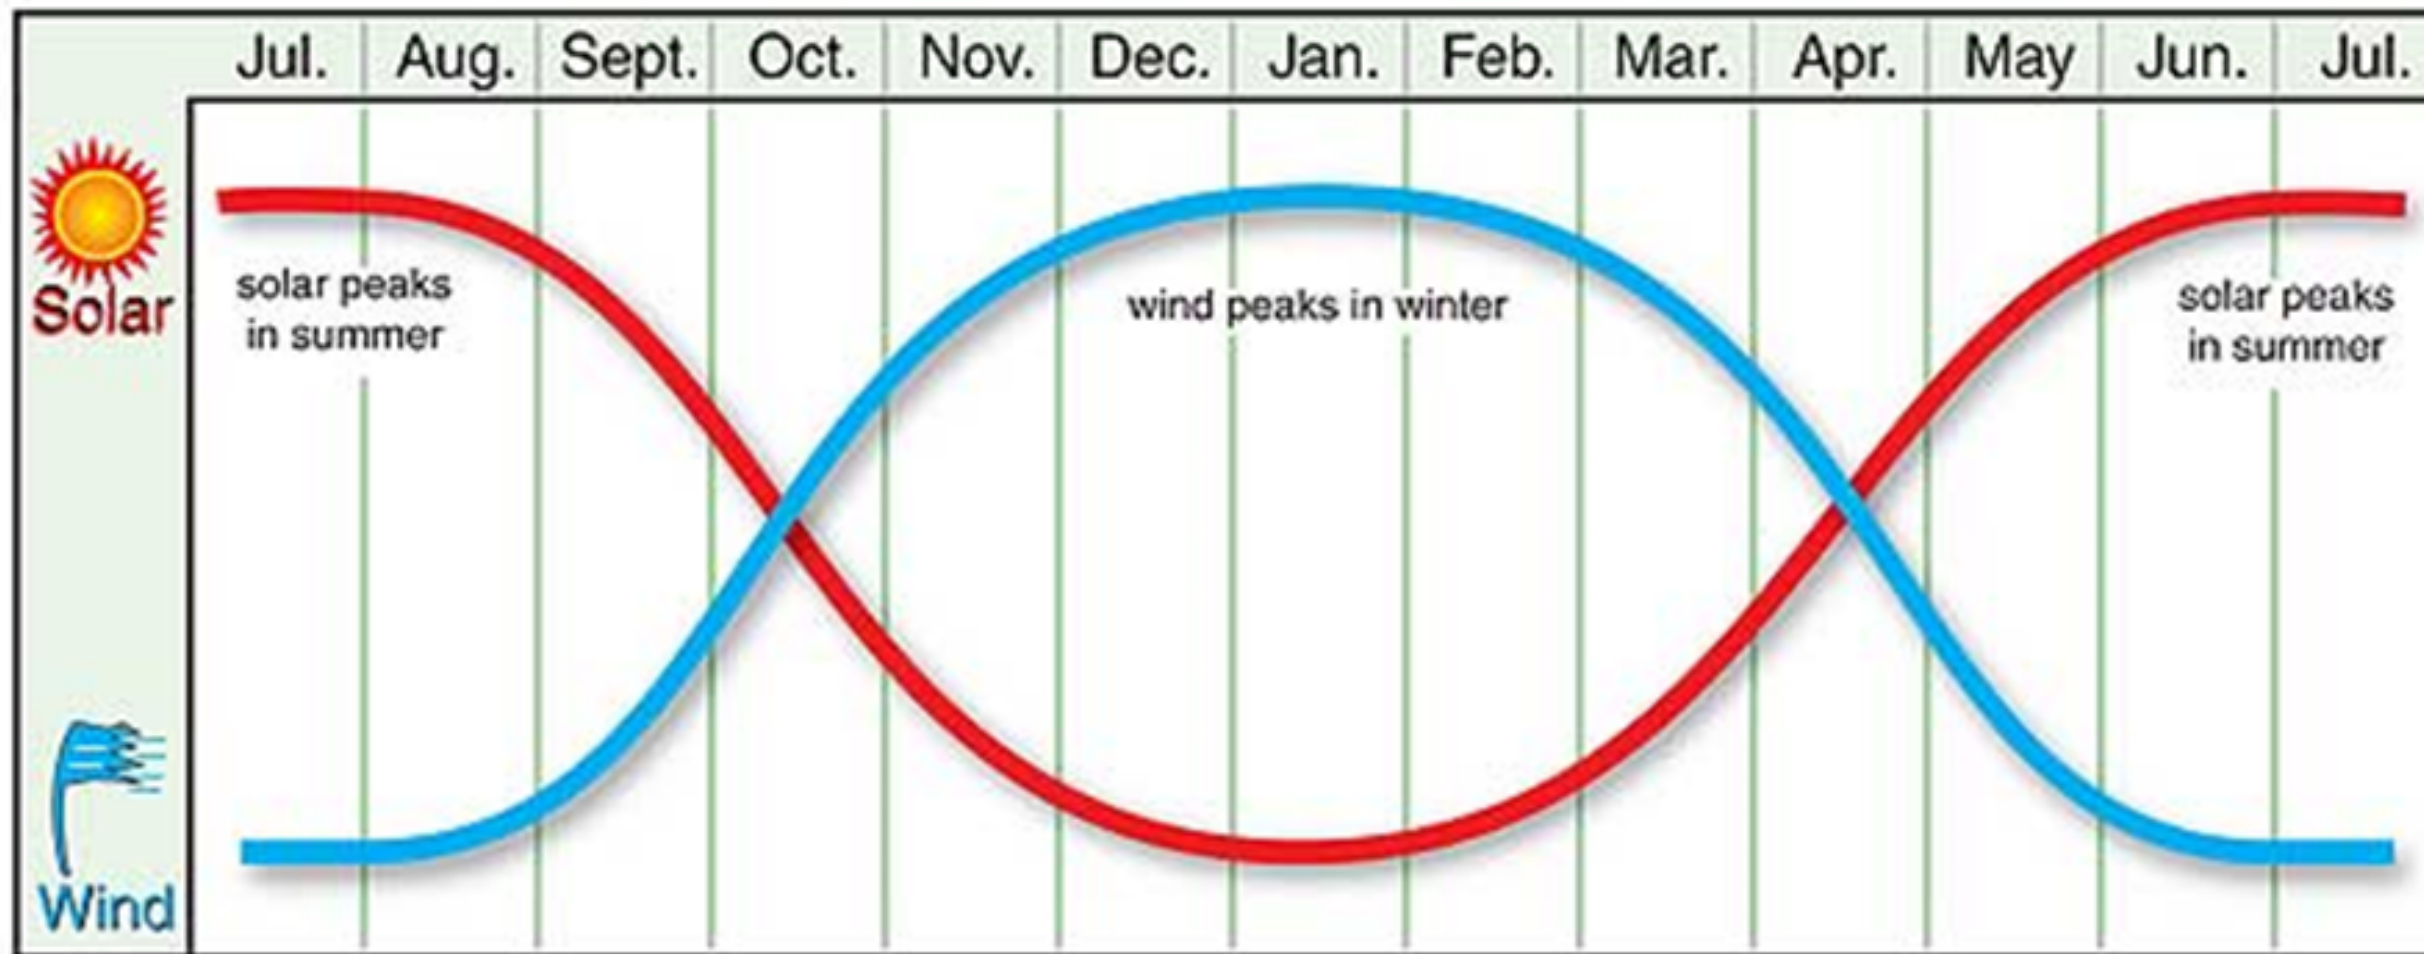

more wind

more sun

Solar Output Peaks in Summer, Wind Output Peaks in Winter

Hybrid power

We combine solar and wind power to provide sustainable and clean energy for everyone at anytime.

Decentralized energy supply

We generate electric power locally where it is consumed for on-grid or off-grid applications.

Smart technology

We provide affordable and compact all-in-one, stand-alone, plug & play systems, easy to install and to operate.

24/7 Solution
