

Off-Grid Bioenergy for Energy Autonomy

WattAnyWhere

The grid is not an option anymore !

3 years or more to get power at 250kVA+

Minimum 600 k€ cost

Everyone struggling to get the right amount of power at the right place

Alternative to the grid: Clean electricity generator 100% renewable

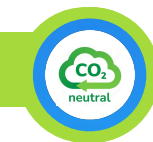

Eco-friendly

Cost-efficient

NOx free & noiseless

CO2 neutral

High power

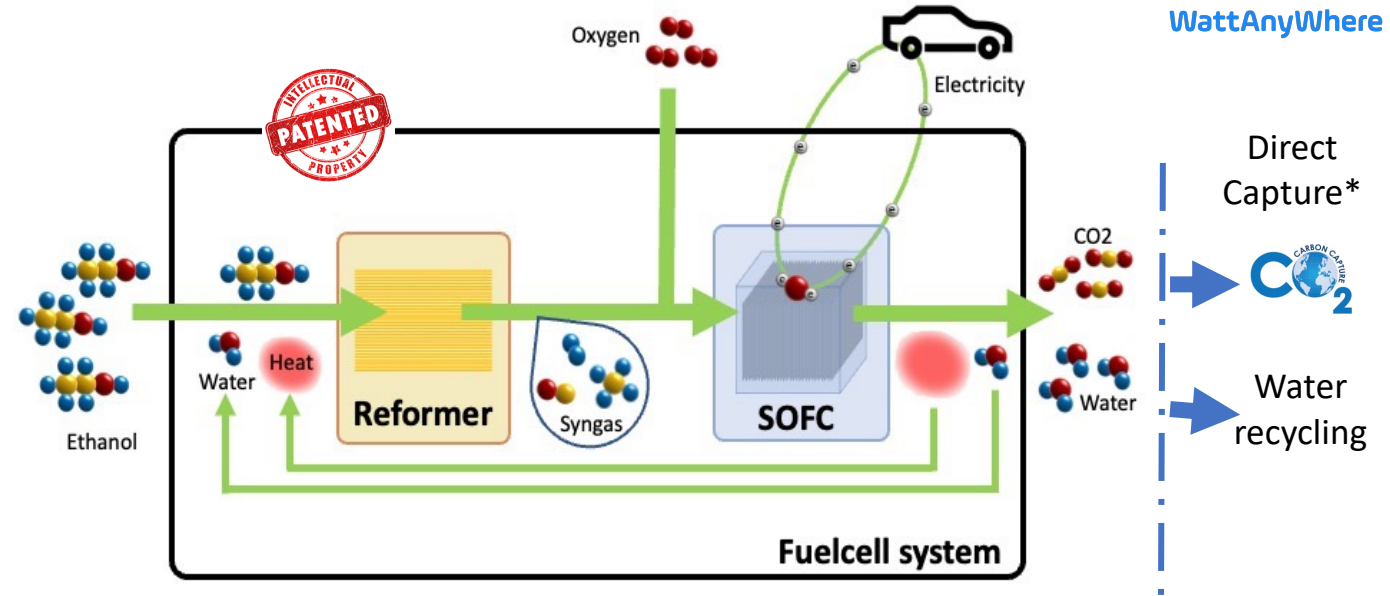

Fast installation

Transportable

Leveraging billions of liters of renewable ethanol from Biomass residue produced in Europe

No more engine! A unique fuel-cell system to upcycle excess ethanol with x2 efficiency. The future of clean energy!

* Capture and storage by third party
