A long battery life pays off!

- Batteries are a very expensive asset.
- Battery ageing depends on operation and storage conditions.
- It is in your hands to optimize your battery life!

Impact

We support you on the BESS journey

Planning / Implementation

- Simulation
- Dimensioning
- On demand support

Operation

- Optimize operation point and strategy
- Early detection of potential failures
- Dynamic pricing between battery owner and user

End of Life

- Ensure performance on a degraded battery
- Enlarge usage period beyond warranty

We are looking forward to our collaboration!

Why batterylog?

- Agile and customer centric
- Established design patterns
- Pool of specialists on demand
- Individual solutions, white-label integration in existing systems
