Geothermal without drilling

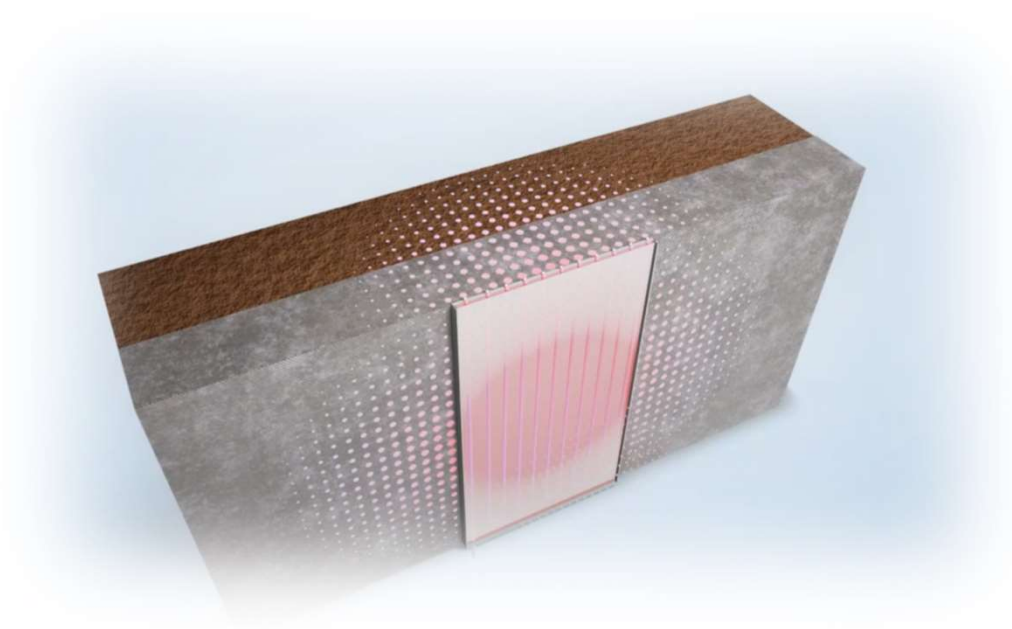

Energy Startupday
Margaux Peltier – 14 Decembre 2023

We turn underground spaces into renewable energy sources

Geothermal technology without drilling

This worldwide innovation allows you to turn your parking lots into a renewable energy source that decarbonizes your buildings.

Added value

- ✓ An energy available 24/7.
- ✓ Independent of weather conditions.
- ✓ Easy to install.
- ✓ No drilling.
- ✓ No direct CO₂ emissions.
- ✓ An additional communication tool.

**2 cm
thick**

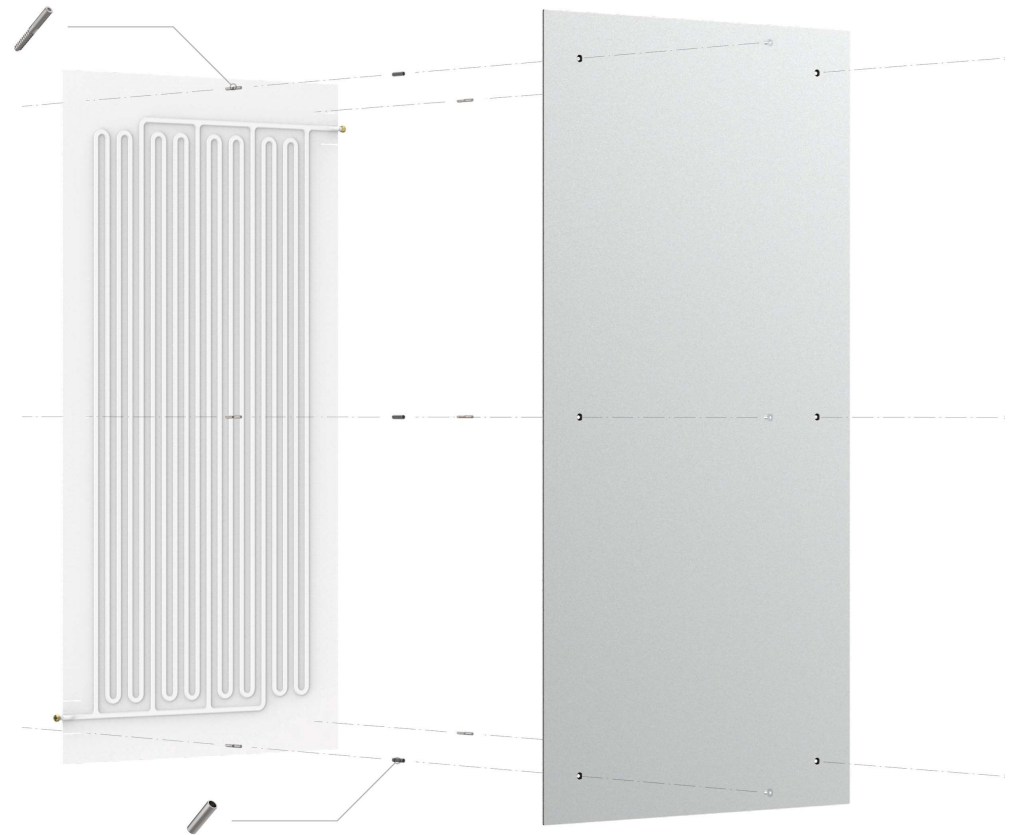

**< 15 min
installation**

150 W/m²

enerdrape

200 GEOTHERMAL PANELS

-40 tons of CO₂ saved
each year

30-35 % of their needs

150 w/m² of heating power

A meaningful climate impact

Reduction potential of
100 Mtons
of CO₂
per year globally

**Committed for
sustainability**

**Meaningful
carbon mitigation**

**Use of
recyclable materials**

Unlocking underground energy
