

dyneo.

TECHNOLOGIES

Data-driven solutions for **efficient** and **sustainable** thermal network
management

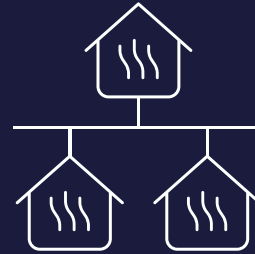

Max Carrel
Co-founder
mca@dyneo.ch
www.dyneo.ch

Thermal energy in Switzerland

50%
energy consumption

35%
GHG emissions

District
Heating and Cooling

Network Expansion

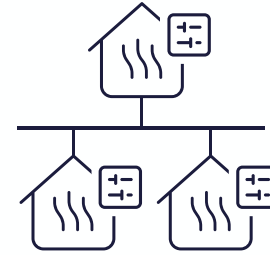

Decarbonation

Digitalize
consuming buildings

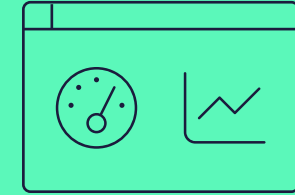

½ day installation time per
consuming site

Automatic
optimization

Machine learning powered
control algorithms

Network operation
insights

Prescriptive analytics for
enhanced operation

Key Benefits

Higher energy efficiency

Lower operating temperature

Reduced peak load

Increased profitability

Improved impact

Increased capacity

Achievements

3
Equipped networks

75+
Digitalized consuming sites

150k
m² connected

Data-driven solutions for **efficient** and **sustainable** thermal network
management
